1 First section

This section describes our software

1.1 Purpose and mission

The goal of this project is to understand the 'phaser 3' library, using 'socket.io' for live communication and a database for player data saving and loading.

1.2 competitors

Other multiplayer RPG like projects already exist. eg.: Runescape, Black desert online, Final fantasy and many more. So what is different about this project? This game can be launched from your browser and played on it. Other larger scale games usually require a dedicated launcher to play.

Listing 1. Pagrindinio metodo žingsniai

```
1 public static void main(String args []) {  
2 }
```

Conclusions and Recommendations

Išvados bei rekomendacijos.

Ateities tyrimų planas

Pristatomi ateities darbai ir/ar jų planas, gairės tolimesniems darbams....
